

Indian Standard

SPECIFICATION FOR HOOKS, AURAL

0. FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 25 October 1966, after the draft finalized by the Surgical Instruments Sectional Committee had been approved by the Consumer Products Division Council.

0.2 The formulation of Indian Standards on surgical instruments has been taken up on the recommendations of the Advisory Committee for Development of Surgical Instruments, Medical Equipment and Hospital Appliances of the Ministry of Industry, Government of India.

0.3 The two types of hooks covered in this standard are expected to cater to the needs of most of the ENT work, thus eliminating most other types and sizes.

0.4 This Indian Standard is one of a series on surgical instruments. Other standards published so far in the series appear on P 8.

0.5 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated; expressing the result of a test, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

1. SCOPE

1.1 This standard covers the requirements of aural hooks of the following patterns used in ENT work:

- a) Watson William's pattern with Cerumen spud and hook, and
- b) Gardiner Brown's pattern with hook and Imray's loop.
