Indian Standard**SPECIFICATION FOR BRUSH, STENCIL****0. FOREWORD**

0.1 This Indian Standard (Second Revision) was adopted by the Indian Standards Institution on 7 June, 1985, after the draft finalized by the Brushware Sectional Committee had been approved by the Chemical Division Council.

0.2 This standard was first published in 1967. In the first revision, the requirements for moisture content, length of nails and ferrule and mass of bristles were modified. Test for the detection of dye in bristles and benzene alcohol test were also added.

0.3 In this revision the overall length has been replaced by length of the handle outside the ferrule, protrusion and mass of bristles has been increased. Also, inclusion of general quality of black bristles as the filling material has been specified since they are preferred by art designers or sign painters.

0.4 Brushes stencil are used for reproducing or marking with ink or paint of patterns or letters on other surfaces by use of stencils.

0.5 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in the standard.

1. SCOPE

1.1 This standard prescribes the requirements and the methods of sampling and test for brush stencil.

*Rules for rounding off numerical values (*revised*).

†Glossary of terms used in brushware industry.
