Indian Standard

METHODS OF TEST FOR STABILIZED SOILS

**PART II DETERMINATION OF MOISTURE
CONTENT OF STABILIZED SOIL
MIXTURES**

1 SCOPE

1.1 This standard (Part II) lays down the method for the determination of moisture content of stabilized soil mixtures with non volatile stabilizers (Section 1) and with volatile stabilizers (Section 2)

**SECTION 2 STABILIZED SOIL MIXTURES WITH VOLATILE
STABILIZERS (DISTILLATION METHOD)**

7 SCOPE

7 1 This method covers the determination of the moisture content of stabilized soil as a percentage of the weight of the dry soil or weight of dry soil plus stabilizer. It is necessary to use this method when the stabilizer contains a significant proportion of volatile matter for example in the case of certain bituminous materials The method may also be used with other stabilizing agents
