Indian Standard

CODE FOR TRANSPORT OF PIGS BY RAIL AND ROAD

(First Revision)

1 SCOPE

1.1 This code covers the minimum requisites for the transport of pigs by rail and road.

FOREWORD

0.1 This Indian Standard (First Revision) was adopted by the Indian Standards Institution on 30 September 1982, after the draft finalized by the Live Animals Sectional Committee had been approved by the Agricultural and Food Products Division Council.

0.2 Of late, piggery has been taken up on a large scale to meet the increased demand of protein and food of animal origin in the country. This has necessitated the transport of large number of pigs to various places both by rail and road.

0.3 This code was first published in 1969. The present revision has been brought out to bring its requirements upto date based on experience gained.

0.4 In the preparation of this code, due consideration has been given to the Prevention of Cruelty to Animals Act, 1960 and Rules framed thereunder. However, it is subject to the restrictions imposed under these, wherever applicable.

0.5 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

*Rules for rounding off numerical values (*revised*).
