Indian Standard

GLOSSARY OF TERMS RELATING TO CEMENT CONCRETE

PART VII MIXING, LAYING, COMPACTION, CURING AND OTHER CONSTRUCTION ASPECTS

FOREWORD

0.1 This Indian Standard (Part VII) was adopted by the Indian Standards Institution on 16 February 1973, after the draft finalized by the Cement and Concrete Sectional Committee had been approved by the Civil Engineering Division Council.

0.2 Cement concrete is one of the most versatile and extensively used building materials in all civil engineering constructions. There are a number of technical terms connected with the basic materials for concrete as well as the production and use of concrete which quite often require clarification to give precise meaning to the stipulations in the standard specifications, codes of practices and other technical documents. It has, therefore, become necessary to standardize the various terms and definitions used in cement and concrete technology and thus avoid ambiguity in their interpretations. The Sectional Committee has, therefore decided to bring out a series of glossaries of terms relating to concrete and concrete materials.

1. SCOPE

1.1 This standard (Part VII) covers definitions of terms relating to mixing, laying, compaction, curing and other construction aspects.
