Indian Standard

SPECIFICATION FOR TRACTOR OPERATED DISC HARROWS

FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 17 July 1972, after the draft finalized by the Farm Implements and Machinery Sectional Committee had been approved by the Agricultural and Food Products Division Council.

0.2 With the increase in the number of tractors, tractor operated disc harrows are also being manufactured and used in large number in the country for preparation of seed beds. The need was, therefore, felt for an Indian Standard for introduction of uniform quality control practices in the manufacture of disc harrows. This standard specifies essential dimensions for disc harrows without freezing any design. The figures given in this standard are for illustration and for guidance only.

1. SCOPE

1.1 This standard prescribes material and requirements for the disc harrows operated by agricultural tractors.
