Indian Standard
**METHODS FOR
DETERMINATION OF MOISTURE IN WOOL**

1 SCOPE

1.1 This standard prescribes two methods for determination of moisture in wool.

1.2 This standard is applicable to wool in all forms, namely, greasy wool, scoured wool, carded wool, garnetted wool, wool top, wool roving, etc, except that Method I is not applicable to wool containing steam-distillable or water-soluble matter and Method II is not applicable to greasy wool.
