

Indian Standard
**SPECIFICATION FOR
POTASSIUM SCHOENITE**

0. FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 8 September 1972, after the draft finalized by the Acids and Fertilizers Sectional Committee had been approved by the Chemical Division Council.

0.2 Potassium schoenite is a double salt having the composition $K_2SO_4.MgSO_4.6H_2O$. It is manufactured from salt bitterns.

0.3 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

1. SCOPE

1.1 This standard prescribes the requirements and the methods of test for potassium schoenite used as a fertilizer.
