Indian Standard

INFORMATION AND DOCUMENTATION — INTERNATIONAL STANDARD BOOK NUMBER (ISBN)

(*Second Revision*)

1 Scope

The purpose of this International Standard is to establish the specifications for the International Standard Book Number (ISBN) as a unique international identification system for each product form or edition of a monographic publication published or produced by a specific publisher. It specifies the construction of an ISBN, the rules for its assignment and use, the metadata to be associated with the ISBN allocation, and the administration of the ISBN system.

This International Standard is applicable to monographic publications (or their individual sections or chapters where these are made separately available) and certain types of related products that are available to the public. Examples of applicable and non-applicable products are provided in Annex A.

NOTE More detailed, operational guidance is provided in a users' manual available from the Registration Authority for this International Standard (see Clause 8).

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 639-2, *Codes for the representation of names of languages — Part 2: Alpha-3 code*

ISO 3166-1, *Codes for the representation of names of countries and their subdivisions — Part: Country Codes*

ISO 8601, *Data elements and interchange formats — Information interchange — Representation of dates and times*

ISO/IEC 15420:2000, *Information technology — Automatic identification and data capture techniques — Bar code symbology specification — EAN/UPC*
