Indian Standard

**AGRICULTURAL PRODUCE PROCESSING
EQUIPMENT – GLOSSARY OF TERMS**

(First Revision)

1. SCOPE

1.1 This standard covers the definitions of various terms relating to agricultural produce processing equipment.

FOREWORD

This Indian Standard (First Revision) was adopted by the Bureau of Indian Standards, after the draft finalized by the Agricultural Produce Processing and Milling Machinery Sectional Committee had been approved by the Food and Agriculture Division Council.

With the increasing emphasis on processing of agricultural produce, particularly grains, seeds and fodder, a large number of equipment are being manufactured and used in the country. A need was, therefore, felt to prepare a standard giving authentic definitions to the various terms used in relation to these equipment.

The standard was first published in 1981. This revision has been taken up to incorporate a number of new terminologies and up-date some existing definitions on basis of comments revised.
