7.	The substance and the advantages or impact of the new standard or revision	The recycling of paper is the process by which waste paper is turned into new paper products. There are three categories of waste paper that can be used as feedstock for making recycled paper: mill broke, pre-consumer waste, and post-consumer waste. Mill broke is paper trimmings and other paper scrap from the manufacture of paper, and is recycled in a paper mill. Pre-consumer waste is a material which left the paper mill but was discarded before it was ready for consumer use. Post-consumer waste is material discarded after consumer use, such as old corrugated containers, old magazines, and newspapers etc. This standard is developed to provide guidance to industry professionals, organization and individuals in buying and selling of post-consumer waste as raw material intended for recycling by the paper & board industry in India.
