SYNOPSIS

Doc: MHD 08 (14108) IS/ISO 10139-2:2016 Dentistry — Soft lining materials for removable dentures — Part 2: Materials for long-term use

a) Scope:

This standard specifies requirements for softness, adhesion, water sorption and water solubility, as well as for packaging, marking and manufacturer's instructions for soft denture lining materials suitable for long-term use. These materials may also be used for maxillofacial prostheses.

b) Salient features of content:

The standard describes terms and definitions, classification, requirements, sampling, test methods, requirement for packaging, marking and instructions supplied by the manufacturer

c) Type/grades/classes, if any covered in the standard:

Soft lining materials for long-term use are classified into the following types

- Type A: soft;
- Type B: extra soft.
