**IEC TS 60904-13:2018**

Photovoltaic Devices –Part 13: Electroluminescence of photovoltaic modules

This standard specifies methods to:

- capture electroluminescence images of photovoltaic modules,
- process images to obtain metrics about the images taken in quantitative terms, and
- provide guidance to qualitatively interpret the images for features in the image that are observed.
- This document is applicable to PV modules measured with a power supply that places the cells in the modules in forward bias.
