FORMAT FOR SYNOPSIS OF INDIAN STANDARDS

Number and Title of the Indian Standard:	IS/ISO 28003 : 2007 Security management systems for the supply chain Requirements for bodies providing audit and certification for of supply chain security management systems **Doc. No. MSD 4 (13339)**
a)Scope b) Salient features of content:	This Standard contains principles and requirements for bodies providing the audit and certification of supply chain security management systems according to management system specifications and standards such as ISO 28000. It defines the minimum requirements of a certification body and its associated auditors, recognizing the unique need for confidentiality when auditing and certifying/registering a client organization. Requirements for supply chain security management systems can originate from a number of sources, and this Standard has been developed to assist in the certification of supply chain security management systems that fulfil the requirements of ISO 28000, Specification for security management systems for the supply chain, and other supply chain security management system International Standards. The contents of this Standard may also be used to support certification of supply chain security management systems that are based on other specified supply chain security management system requirements. This Standard — provides harmonized guidance for the accreditation of certification bodies applying for ISO 28000 (or other specified supply chain security management system requirements) certification/registration; — defines the rules applicable for the audit and certification of a supply chain security management system complying with the supply chain security management system standard's requirements (or other sets of specified supply chain security management system requirements); — provides the customers with the necessary information and confidence about the way certification of their suppliers has been granted.
c) Type/grades/ classes, if any covered in the standard:	Nil
