SYNOPSIS

Doc. No.: MHD 09 (13786)
IS No.: IS/ISO 8669-2: 1996
IS Title: Urine collection bags - Part 2 : Requirements and test methods

a) Scope:

This Indian Standards specifies performance requirements and test methods for open-ended and closed-ended urine collection bags of the following types:

- a) urine collection bags intended to be worn on the body (body-worn bags);
- b) urine collection bags intended to be used with a hanger or a floor stand (non-body-worn bags).

It does not apply to urostomy bags, urimeters and urine bags intended specifically for paediatric use.

b) Salient features of content:

The urine collection bags collect urine for purposes of simple elimination or for medical/ forensic analysis of urine. The device is fixed as an aid for persons with disabilities. This Indian Standard will help in rationalizing the quality and dimensions of the urine collection bags.

a) Type/grades/classes, if any covered in the standard: As specified in the Indian Standard
