METAL SIDE RACKS (ADJUSTABLE TYPE) – SPECIFICATION

(Second Revision)

This standard covers the requirements for adjustable metal side racks.

This standard was first published in 1966 and subsequently revised in 1983. In this revision, the following modifications have been carried out:

- a) Reference standards for raw materials and components and finish have been updated;
- b) Provision for use of powder coating finish has been added; and
- c) Marking clause has been updated.
