Circular Economy — Review of Existing Value Networks

ICS 03.100.01; 13.020.20

Environmental Management Sectional Committee, CHD 34

Last date for Comments: 08 July, 2024

NATIONAL FOREWORD

(Formal clause will be added later)

This standard reviews the characteristics and structures of some existing value networks as examples in accelerating a circular economy transition process.

ISO 59010 gives guidance on a critical aspect in transitioning an organization's business model and processes from linear to circular and transforming an organization's business ecosystem into a value network. This document complements ISO 59010 by providing further information on value networks.

The objectives of this standard are

- to provide useful information by analysing existing value networks;
- to enhance understanding of the success factors and enablers for creating value networks derived from examples.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appears referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.
