**NATIONAL FOREWORD**

*(Adoption clause will be added later)*

This Indian Standard (Part 5) was originally published in 1971 and was subsequently revised in 2001 as identical adoption of ISO 1442: 1997 ‘Meat and meat products — Determination of moisture content (Reference method)’ under dual numbering. This second revision of the standard has been undertaken to harmonize with the latest version of ISO 1442 as document ISO 1442: 2023 ‘Meat and meat products — Determination of moisture content — Reference method’ and is an identical adoption of the ISO document under dual numbering.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations.

Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

The technical committee has reviewed the provision of the following International Standard referred in this adopted standard and has decided that it is acceptable for use in conjunction with this standard:

<i>International Standard</i>	<i>Title</i>
ISO 3696	Water for analytical laboratory use — Specification and test methods

In reporting the result of a test or analysis made in accordance with this standard, if the final value, observed or calculated, is to be rounded off, it shall be done in accordance with IS 2: 2022 'Rules for rounding off numerical values (*second revision*)'.

**FOR COMPLETE TEXT OF THE DOCUMENT, KINDLY REFER ISO 1442: 2023**

**Note:** The technical content of the document has not been enclosed as these are identical with ISO 1442: 2023. For obtaining the hard copy of the complete ISO Standard, please contact:
