Draft Indian Standard

PESTICIDES AND OTHER AGROCHEMICALS — COMMON NAMES

(Third Revision of IS 885)

(Adoption of ISO 1750 : 2023)

ICS No. 65.100.01

Pesticides Sectional Committee, FAD 01

Last Date of Comments: **17 August 2024**

NATIONAL FOREWORD

This standard was first published in 1956. The first revision was brought out in 1967. In 1994, the second revision was issued to incorporate common names of several chemicals used in the country and also to bring the standard in line with the international work done in this field.

The third revision of this standard has been undertaken to harmonize it with ISO 1750 : 2023 'Pesticides and other agrochemicals – Common names' and is an identical adoption of ISO standard under dual numbering.

The text of ISO standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In reporting the result of a test or analysis made with this standard, if the final value, observed or calculated, is to be rounded off, it shall be done in accordance with IS 2: 2022 'Rules for rounding off numerical value (*second revision*)'.

'FOR COMPLETE TEXT OF THE DOCUMENT, KINDLY REFER ISO 1750 : 2023

Note: The technical content of the document has not been enclosed, as these are identical with the corresponding ISO Standard. For obtaining the hard copy of the complete ISO Standard, please contact:
