**NATIONAL FOREWORD**

*(Adoption clause would be added later)*

This Indian Standard which is identical with ISO 7541 : 2020 ‘Spices and condiments — Spectrophotometric determination of the extractable colour in paprika’ issued by the International Organization for Standardization (ISO).

This standard was first published in 2006 by adopting ISO 7541 : 1989 ‘Ground (powdered) paprika — Determination of total natural colouring matter content’ under dual numbering system. This revision has been undertaken to align with the latest version of ISO 7541, in which the following modifications have been made:

- estimation using a spectrophotometer has been retained and estimation using coloured glass filters has been deleted;
- the normative references have been updated.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 'Rules for rounding off numerical values (*revised*)'.

‘FOR COMPLETE TEXT OF THE DOCUMENT, KINDLY REFER ISO 7541 : 2020.

Note: The technical content of the document has not been enclosed as these are identical with the corresponding ISO Standard. For obtaining copy of the complete ISO Standard, please contact:
