BUREAU OF INDIAN STANDARDS

DRAFT FOR COMMENTS ONLY

(Not to be reproduced without the permission of BIS or used as an Indian Standard)

DRAFT AMENDMENT NO. 1

TO

IS 14817 (PART 6): 2004/ ISO 10816-6: 1995 MECHANICAL VIBRATION — EVALUATION OF MACHINE VIBRATION BY MEASUREMENTS ON NON-ROTATING PARTS

PART 6: RECIPROCATING MACHINES WITH POWER RATINGS ABOVE 100 KW

ICS 17.160; 21.240

Mechanical Vibration and Shock Condition	Last date of receipt of
Monitoring Sectional Committee, MED 28	comment is 06 April 2024

NATIONAL ANNEX

(Adoption clause to be added later)

The amendment of this standard has been undertaken to align it with the latest amendment of ISO 10816-6: 1995 'Mechanical vibration — Evaluation of machine vibration by measurements on non-rotating parts Part 6: Reciprocating machines with power ratings above 100 kW'.

The text of ISO standard has been approved for publication as Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as a decimal marker.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2:2022 'Rules for rounding off numerical values (second revision)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

NOTE: The technical content of the document has not been enclosed as these are identical with the corresponding ISO standard. For details, please refer the corresponding **ISO 10816-6**: **1995/ Amd 1**: **2015** or kindly contact:
