Draft Indian Standard

GLOSSARY OF TERMS USED IN RUBBER INDUSTRY

(*First Revision of IS 7503*)

(ICS 83.060; 01.040.83)

Rubber and Rubber Products Sectional Committee,
PCD 13

Last date for comment
09 April 2024

NATIONAL FOREWORD

(*Formal clauses will be added later*)

The standard was originally published in 2018 under dual numbering with ISO 1382 : 2012. The first revision has been undertaken to align it with the latest version of ISO 1382 : 2020 in dual numbering system to make pace with latest developments that have taken place at international level.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions and terminologies are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

For tropical countries like India, the standard temperature and the relative humidity shall be taken as $27 \pm 2^{\circ}\text{C}$ and 65 ± 5 percent, respectively.

<p>NOTE — The technical content of the document is not available on website. For details, please refer the corresponding ISO 1382:2020 or kindly contact:</p>
