Basic Standards Sectional Committee, PGD 1

## NATIONAL FOREWORD

This Indian Standard (Part 3) which is identical with ISO 20712-3 : 2020 ‘ Water safety signs and beach safety flags’ issued by the International Organization for Standardization (ISO) was adopted by the Bureau of Indian Standards on recommendation of the Basic Standards Sectional Committee and approval of the Production and General Engineering Division Council.

This standard was originally published in 2018. The first revision of this standard has been undertaken to align it with the latest version of ISO 20712-3 : 2020

The major changes in this revision are as follows:

- all four references in Clause 2 moved to the Bibliography as these are informative;
- 3.3, 'distance factor' added as an admitted term;
- NOTE's in 5.2, 6.5, Annex D and Annex E changed to body text;
- minor editorial changes.

Other parts in this series are:

- Part 1 Specifications for water safety signs used in workplaces and public areas.
- Part 2 Specifications for beach safety flags - Colour, shape, meaning and performance.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain convention are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 1960 ‘Rules for rounding off numerical values (*revised*).’ The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.
