Draft Indian Standard

Tools for Pressing — Vocabulary

ICS 25.120.10

Metal Forming Machines Sectional Committee,
PGD 04

Last Date for Comments: **05-07-2024**

NATIONAL FOREWORD

This Indian Standard which is identical with ISO 21223 : 2019 ‘Tools for Pressing — Vocabulary’ issued by the International Organization for Standardization (ISO) will be adopted by the Bureau of Indian Standards on the recommendation of the Metal Forming Machines Sectional Committee and approval of the Production and General Engineering Division Council.

This Standard establishes the terms and definitions of the main types of tools for pressing, their features, and dimensional characteristics.

The text of ISO standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current-practice is to use a point (.) as the decimal marker.

For the purpose of deciding whether a particular requirement of this standard is complied with the final value, observed or calculated, expressing the result of a test or analysis shall be rounded off in accordance with IS 2 : 2022 ‘Rules for rounding off numerical values (*second revision*)’.

NOTE: The technical content of draft standard is not available on website. For details, please refer to ISO 21223 : 2019 or contact:
