NATIONAL FOREWORD

This Indian Standard which is identical with ISO 723 : 1991 'Rock drilling equipment — Forged collared shanks and corresponding chuck bushings for hollow hexagonal drill steels' issued by the International Organization for Standardization (ISO), will be adopted by the Bureau of Indian Standards on the recommendation of the Pneumatic and Hydraulic Tools Sectional Committee, and approval of the Production and General Engineering Division Council.

This International Standard specifies the dimensions of forged collared shanks for hollow hexagonal drill steels in bar form for rock drilling. It also specifies the dimensions for the corresponding chuck bushings.

The text of ISO standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

The technical committee has reviewed the provisions of the following International Standard referred in this adopted standard and has decided that it is acceptable for use in conjunction with this standard:

International Standard

Title

ISO 722 : 1991

Rock drilling equipment — Hollow drill steels in bar form, hexagonal and round.

NOTE: The technical content of draft standard is not available on website. For details, please refer to ISO 723 : 1991 or contact:
