

BUREAU OF INDIAN STANDARDS
DRAFT FOR COMMENTS ONLY

NOT TO BE REPRODUCED WITHOUT PERMISSION OF BIS OR USE AS STANDARD.

PGD 39 (22132) WC
March 2023

भारतीय मानक मसौदा

**लेजर एवं लेजर संबंधित उपकरण — लेजर बीम मापदंडों के
परीक्षण की पद्धतियाँ — ध्रुवीय**
(*IS 14965 का दूसरा पुनरीक्षण*)

Draft Indian Standard

**Lasers and laser-related equipment — Test methods for laser beam
Parameters — Polarization**
(*Second Revision of IS 14965*)

ICS 31.260

Optics and Photonics Sectional Committee, PGD 39 Last Date of Comments 20-04-2023

NATIONAL FOREWORD

(Formal clause will be added later)

This standard was originally published in 2001. First revision was based on ISO 12005 : 2003 ‘Lasers and Laser-Related Equipment — Test Methods for Laser Beam Parameters Polarization’. The second revision has been taken to align it with the latest version of ISO 12005.

The major changes in this revision are as follows:

- a) Description errors in 4.5 (Analysis of the results) were corrected;
- b) Definitions of the “degree of polarization” and the “degree of linear polarization” were made clear;
- c) Definition of extinction ratio was changed; and
- d) Previous 3.3 (direction of polarization), 3.4 (plane of polarization), and 3.5 (ellipticity) were deleted, because these terms are confusing due to the different definitions, and they are not necessarily required for this document. Previous 3.11 (Stokes parameters) was deleted and moved to Annex A, because they are not used in the measurement and analysis.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminology and conventions are however not identical to those used in Indian Standards Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as decimal marker while in Indian Standards, the current practice to use a full point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards, which are to be substituted in their respective places, are listed below along with their degree of equivalence for the editions indicated

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 11145, Optics and photonics — Lasers and laser-related equipment — Vocabulary and symbols	IS/ISO 11145 : 2023 Optics and optical instruments — Lasers and laser - Related equipment — Vocabulary and symbols	Identical with ISO 11145 : 2018
ISO 11554, Optics and photonics — Lasers and laser-related equipment — Test methods for laser beam power, energy and temporal	IS 14963 : 2023 Optics and optical instruments - Lasers and laser — Related equipment — Test methods for laser beam power, energy and temporal characteristics	Identical with ISO 11554 : 2017

The technical committee has reviewed the provisions of the following International Standard referred in this adopted standard and has decided that it is acceptable for use in conjunction with this standard:

<i>International Standard</i>	<i>Title</i>
CIE 059 : 1984	Definitions and Nomenclature, Instrument Polarization

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 'Rules for rounding off numerical values (*second revision*)'.

NOTE: The technical content of draft standard is not available on website. For details please contact:
