Part 2 Test Methods for Wave Front Aberrations**

ICS 31.260

Optics and Photonics Sectional Committee PGD 39

NATIONAL FOREWORD

This draft Indian Standard which is identical with ISO 14880-2 : 2006 ‘Optics and Photonics — Microlens Arrays — Part 2: Test Methods for Wave front Aberrations’ issued by the International Organization for Standardization (ISO) will be adopted by the Bureau of Indian Standards on the recommendation of the Optics and Photonics Sectional Committee and approval of the Production and General Engineering Division Council.

The market in microlens arrays is generating an urgent need for agreement on basic terminology and test methods for a definition of the microlens array itself. Standard terminology and a clear definition are needed not only to promote applications but also to encourage scientists and engineers to exchange ideas and new concepts based on common understanding. Considering this the Optics and Photonics Sectional Committee decided to adopt the ISO 14880-1 as an Indian Standard. This standard is published in 5 parts. The other parts in this series are:

Part 1	Vocabulary
Part 3	Test methods for optical properties other than wave front aberrations
Part 4	Test methods for geometrical properties
Part 5	Guidance on testing

The text of ISO standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current-practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to the following International Standard for which Indian Standard also exists. The corresponding Indian Standard which is to be substituted in its place is listed below along with its degree of equivalence for the edition indicated

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 14880-1 Optics and photonics — Microlens arrays — Part 1: Vocabulary	IS XXXX (Part 1): XXXX/ ISO 14880-1: 2019 Optics and Photonics — Microlens arrays Part 1 Vocabulary	Identical

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 ‘Rules for rounding off numerical values (*second revision*).’

NOTE: The technical content of draft standard is not available on website. For details, please refer to ISO 14880-2 : 2006 or contact:
