COMPUTATION OF SGPA, YGPA AND CGPA

Semester Grade Point Average $(S_i) = \Sigma (C_i \times G_i) / \Sigma C_i$

Yearly Grade Point Average= $(SGPA_{(odd)} \times \Sigma C_{i(odd)} + SGPA_{(Even)} \times \Sigma C_{i(Even)}) / (\Sigma C_{i(Odd)} + \Sigma C_{i(Even)})$

Cumulative Grade Point Average $= \Sigma (C_i \times S_i) / \Sigma C_i$

Computation of SGPA, YGPA and CGPA

A. SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the subjects taken by a student in a semester **AND** the sum of the number of credits of all the subjects undergone by the student in the same semester, i.e SGPA $(S_i) = \Sigma (C_i \times G_i) / \Sigma C_i$; here, C_i is the number of credits of the i_{th} subject and G_i is the grade point scored by the student in the i_{th} subject.

B. YGPA is calculated at end of each academic year as weighted average of SGPA of odd & even semesters.

C. CGPA is calculated at the end of final year of study as weighted average of SGPA of all semesters of a programme, i.e. CGPA $= \Sigma(C_i \times S_i) / \Sigma C_i$ where Si is the SGPA of the i_{th} semester and ΣC_i is the total number of credits in that semester

D. The SGPA, YGPA and CGPA are rounded off to 2 decimal places and reported in the transcripts.

E. Final division is awarded based on CGPA.

CONVERSION OF GRADES INTO PERCENTAGE

Marks in Percent = CGPA x 10

AWARD OF DIVISION

1. FIRST DIVISION WITH HONOURS: CGPA ≥ 7.50
2. FIRST DIVISION: CGPA ≥ 6.50 and < 7.50
3. SECOND DIVISION: CGPA ≥ 5.00 and < 6.50
