

## **GAYA COLLEGE OF ENGINEERING – 17 Oct 2023**

A group of BIS Officers organized a full-day program for educational outreach at Gaya College of Engineering, Gaya on 17th Oct 2023 .

The primary objective was to share information about the recent initiatives undertaken by BIS to engage educational institutions in the field of standardization. During the program, professors and research scholars were briefed on the overview of BIS and the standardization ecosystem in the country. The discussions also covered the role of research projects in the formulation of standards and highlighted how they can contribute to standardization efforts at both the national and international levels.

Faculty members expressed their desire to collaborate with BIS in the areas of Electrical, Civil, Mechanical and Metallurgical Engineering for R&D projects. Need/expectations were shown for the following areas:

- (i) Development of standards for Cyber Security and VLSI**
- (ii) Research and Development on Advance Construction techniques.**
- (iii) Research and Development in the field of Water Resource Management**
