

IS 5187 “Flush Bolts- Specification”

This standard lays down the requirements for flush bolts which are fixed on the shutter of cupboards and doors for bolting the shutter flush with the exterior surface. This standard provides guidance to manufacturers for their proper manufacture and to users for getting a product of adequate quality. The standard specifies the materials used for the manufacture of flush bolts. The standard mentions the requirements regarding manufacturing and construction of the Type 1 and Type 2 Flush bolts . The dimensions alongwith the tolerances of both types of flush bolts are specified. The standard elaborates on the workmanship and finish requirements of the manufactured flush bolts.
