Summary of IS 5437:2024 Rolled Glass — Patterned, Extra Clear Patterned, Wired and Wired-Patterned Glass — Specification

This standard was first published in 1969 with the title 'Figured, Rolled and Wired Glass' and subsequently revised in 1994.

In view of the technological advancements in the industry, rolled glass has been categorized into following four types, namely a) Patterned glass; b) Extra clear patterned glass;c) Wired glass; and d) Wired-patterned glass.

Accordingly, the standard was revised again in 2024 with change of the title. In order to homogenize the standard with international standards, technical assistance has been derived from many standards published by International Organization for Standardization and European Nations.

This standard consists of definitions of Terminology used industry/market, test requirements common to all glass types, specific test requirements to specific glass types, sampling, test methods and requirements related to packing/marking for patterned, extra clear patterned, wired and wired-patterned glass.
