

## **IS 17631: 2022 – Work Chairs – Specification**

IS 17631: 2022 deals with specifications for work chairs, which include completely manufactured or ready-to-assemble chairs used in office environments. This standard covers various chair types, ensuring they meet ergonomic, strength, and durability requirements.

Consumers demand work chairs that offer comfort, adaptability, and ergonomic support to ensure health and productivity in workplace settings. Durability, ease of maintenance, and safety are also crucial.

The standard specifies performance criteria for work chairs, focusing on stability, strength, and durability tests to simulate normal and extreme use conditions. It defines requirements for materials, design, and workmanship, ensuring that chairs are safe, reliable, and comfortable. The standard also addresses the need for surface resistance to mechanical damage and environmental factors, ensuring long-term usability and maintenance ease in office environments.

**Keywords:** Ergonomic office chairs, durable work chairs, adjustable chairs, office furniture standards, ergonomic seating solutions, office chair.
