

## Indian Standard IS 17636:2021 - Specification for Bunk Beds

**Indian Standard IS 17636:2021 - Specification for Bunk Beds** provides guidelines for the design, safety, material, and performance requirements of bunk beds used in homes, institutions, and other residential or commercial environments. The standard aims to ensure that bunk beds are safe, durable, and comfortable for use, particularly for children and adults, by specifying the necessary construction practices, material quality, and safety features.

The standard defines **dimension, Surface performance, Safety requirements, Ladder specifications, Strength of frame and fastening, Stability of bed** to ensure the stability and durability of Bunk Bed.

IS 17636:2021 sets out comprehensive guidelines and specifications to ensure that bunk beds are designed, constructed, and tested to meet high safety and durability standards. The aim is to provide safe, functional, and reliable products for consumers, particularly in environments where **space efficiency** is important.
