

## Mancozeb: The Ultimate Shield for Your Crops

### IS 8707:2013

**Mancozeb** is a game-changing fungicide, trusted to guard crops against a variety of foliage diseases. This yellow-green powder is a carefully crafted blend of **manganese** and **zinc ethylene bisdithiocarbamate**, offering a perfect balance of potency and reliability. With at least **20% manganese** and **2.5% zinc**, it's not just effective—it's indispensable for modern agriculture.

Farmers and agricultural professionals demand a product that's not just effective but also safe and consistent. High-quality mancozeb delivers with its **uniform composition**, **purity**, and **chemical stability**. Contaminants like **ethylene thiourea** are strictly limited to **0.5%**, ensuring both safety and efficacy. Even the packaging is designed for excellence, using durable materials like **high-density polyethylene** sacks or laminated jute bags to protect the product during transport and storage.

What makes mancozeb a standout is its rigorous adherence to standards. The formulation is meticulously tested, with a minimum **85% active content** ensuring its powerful fungicidal action. Precision tests, such as **titration for manganese and zinc**, and cutting-edge chromatography for contaminants, guarantee it meets every expectation. Every detail, from its chemical makeup to its safe packaging, reflects its commitment to quality.

Mancozeb is more than just a product—it's a promise to farmers for healthier crops and better yields. With its unmatched reliability and proven performance, it's the trusted shield that crops deserve, season after season.
