

IRIS XBRL Consulting Services: Elevating Global Reporting Standards

XBRL (eXtensible Business Reporting Language)** is a globally recognized, open-source digital standard designed for financial reporting and seamless data exchange. It is widely adopted by business registries, stock exchanges, capital markets, central banks, and governments across the world. XBRL simplifies the collection, storage, analysis, and reporting of complex financial and non-financial data, empowering organizations to derive actionable business insights from diverse data sources.

IRIS XBRL Consulting Services brings unmatched expertise in XBRL taxonomy design, development, quality review, and maintenance. With a proven track record of success across 20+ clients in 16 countries, our interdisciplinary team of consultants helps organizations effectively manage taxonomies using IRIS' proprietary Taxonomy Design and Management methodology.

Our consulting services cover a wide array of reporting taxonomies and domains, ensuring that your business stays ahead in the evolving regulatory landscape.

Why Choose IRIS for XBRL Consulting?

Expertise Across Multiple Domains - Our seasoned XBRL experts possess deep knowledge and experience across various reporting frameworks, including:

- Prudential reporting for banking and insurance
- Business registrar requirements
- IFRS and US-GAAP-based reporting
- Data Point Modeling (DPM)-based taxonomies
- Islamic finance reporting
- Non-financial taxonomies such as the Global Reporting Initiative (GRI) and Corporate Actions

Comprehensive Service Offerings

- Taxonomy Design and Development:
We help design and develop customized XBRL taxonomies tailored to your regulatory and reporting needs.
- Quality Review and Maintenance:
Our team provides ongoing support to ensure the integrity and accuracy of your taxonomies, delivering updates as required by changes in regulations.
- In-depth Training:
Empower your team with expert-led training sessions that deepen their understanding of XBRL standards, tools, and best practices.
- Functional Guidance for IRIS XBRL Products:
We offer comprehensive guidance on how to best use IRIS XBRL products for smooth implementation and reporting.

The IRIS Value Proposition

- Rich Experience

Our team of subject matter experts (SMEs) brings deep knowledge and cross-functional expertise in implementing and maintaining XBRL standards across the globe. With hands-on experience in setting up and testing XBRL specifications, our consultants ensure the highest standards of quality and reliability.

- Reliable Processes

IRIS follows a well-structured, tried-and-tested process model, ensuring seamless service delivery. Our approach is fully customized to meet the unique needs of each client, offering uninterrupted XBRL services from consultation through implementation.

- End-to-End Offering

IRIS is your one-stop solution for all XBRL-related requirements. From consultancy and taxonomy creation to ongoing maintenance and support, IRIS offers everything you need under one roof. Our user-friendly tools, combined with expert training, ensure that your organization is equipped for both development and maintenance with ease.

Data Standards Implementation projects executed over the past decade
